ADAPT WORKSTATION by HOW

Adaptive by Design Locally Made

The Adapt height-adjustable workstation is engineered to support healthier, more dynamic ways of working. Designed with flexibility at its core, Adapt transitions between sitting and standing to encourage movement while supporting both focused individual work and collaborative environments.

Powered by a quiet, three-stage telescopic leg system, Adapt delivers smooth vertical adjustment with a lower minimum and higher maximum height than industry standards. For user safety, an inbuilt anti-collision sensor automatically halts and reverses desk movement if an obstruction is detected.

HOW 10 + 10 Warranty

Sustainability Through Longevity

Because we build for lifelong performance, the Adapt Workstation is backed by our 10+10 Warranty as part of the Reborn product refurbishment programme. At the end of the initial 10-year warranty, the HOW Group team can be brought to conduct an on-site product audit. Our team will touch up finishes, replace necessary mechanical components, and issue a brand new 10-year product warranty.

This modular, repair-first design reduces total cost of ownership, extends asset lifecycles, and actively supports sustainable workplace procurement by keeping commercial furniture out of landfill.

20 Years of Warranty. Ask Us HOW.

howgroup.com.au

Certified Australian Made

Locally designed and manufactured workstation system, providing quality assurance, shorter supply chains and local support.

Intelligent Workstation System

Adapt brings together sit-to-stand functionality, acoustic privacy, integrated technology, and flexible configurations within a cohesive workplace solution

10 + 10 Year Warranty

Our on-site audit and refresh program can renew your product warranty for another decade, giving you 20 years of warranty while keeping furniture out of landfill.

Hybrid Workplace Readiness

Supporting a dynamic mix of focused work, collaboration and connection within a single workstation platform.

Highly Customisable

Being made in Australia ensures the workstation can be easily customised in everything from finishes, acoustic screens, accessories, and configurations

Planning Flexibility

From individual workpoints to 120° collaborative clusters, Adapt offers a versatile range of configurations to support diverse workplace strategies

Extend Life. Reduce Impact. Relove

The Adapt Workstation is engineered for lifelong durability, easy repair, and simple modularity, allowing you to refresh your workspace instead of replacing it.

Human-Centred Design

Available in 3 leg profiles: Oval, Round, and Square. Adapt's three-stage telescopic leg system is paired with a whisper-quiet motor for user comfort.

A modern office interior with a woman walking in the foreground. The ceiling features a complex, wavy wooden structure. The background shows a large screen and office furniture.
