— By Stone Designs —

**GLO  
BB**

The **Globb** collection encapsulates the organic essence and sinuous lines of an elongated globe. Inspired by its geometry, we have created a series of pieces that capture the beauty of its shape and the lightness of its appearance.

Each seat in the **Globb** collection is meticulously designed to evoke the fluid and harmonious movements that we associate with balloons in their most animated state. What is most remarkable about this collection is its ability to come together and form creative combinations, just like the technique of balloon-flexing. These combinations allow you to customize each space, creating unique designs tailored to different individual needs and preferences. In addition to the main seating pieces, the Globb collection is also available in a variety of colors and shapes.

*Design goes beyond aesthetics: innovation, space and furniture go hand in hand to create environments that are friendlier, more comfortable and more motivating for people: environments that are more dynamic, fresh, creative, ergonomic and functional.*

*A business philosophy in which design is part of our DNA, as we apply it to every facet of the company: products, architecture, projects, brand, communication, work spaces ...*

**Materials:** Maximum use of materials to eliminate and minimize scraps. Use of recyclable and recycled materials in those components that do not affect the functionality and durability.  
**Production:** Maximum optimization of energy use. Minimal environmental impact. Last generation technological systems. Zero discharge of wastewater. No VOC coatings. Processes free of heavy metals, phosphates, OC and COD.  
**Transport:** Detachable systems. Volumes that facilitate the optimization of space. Maximum reduction of energy consumption by transport.  
**Use:** Quality and warranty. Long lasting. Replacements available.  
**Disposal:** Waste reduction. Supplier-manufacturer packaging reuse system. Components are easy to be separated. Inks in packaging are water-based, without solvents.

## Standards

**GLOBB** has passed tests done in our technical department as well as the tests done in AIDIMME the Technological Institute for furniture. The tests correspond to:

Standard	Description

## Certificates

The different programmes get points in different environmental categories to get the LEED certificate or WELL certificate (sustainability, material and resources, water, energy and atmosphere, inner environment quality, innovation and design).

and products.

Stone Designs is a multidisciplinary studio that develops both interior design and product projects, but from a prism that makes them unique. That value is none other than the human value. Stone makes projects by and for people. Avant-garde projects because they have always, for almost 25 years now, been focused on the same objective, which is none other than helping us to be happier every day.

What is most remarkable about this collection is its ability to come together and form creative combinations, just like the technique of balloon-flexing.

Cada asiento en la colección **Globb** está diseñado meticulosamente para evocar los movimientos fluidos y armoniosos que asociamos con los globos en su estado más animado. Lo más notable de esta colección es su capacidad para unirse y formar combinaciones creativas, al igual que la técnica de la globoflexia.
