

RIFICOLONA

by e-ggs

Rificolona nasce appesa a un filo e da qui la sua indole giocosa e creativa, a partire dai materiali: il paralume realizzato al 100% in polietilene riciclato ruota dialogando con la luce, spruzzato in trasparenza per modellarne la densità. Rificolona sorvola con delicatezza gli elementi del tuo living, inclinandosi a seconda delle necessità o della luce desiderata in quel preciso momento della giornata.

Rificolona arrives hanging by a thread, to share a playful and creative spirit embodied by its materials: the shade, crafted entirely from recycled polyethylene, rotates in dialogue with the light, its density modified with a transparent spray. Rificolona delicately hovers over the elements in your living space, tilting according to necessity or the light desired at any given time of day.
